# FOUNDATION IN BUSINESS

JPT/BPP(A9505)02/19

The **Foundation in Business (FIB)** programme will provide students with a general understanding of business organisations and their structures along with wider considerations such as environments, markets, processes and how all these work together to contribute to organisational success. The foundation programme will enable students to analyse how businesses are organised, strategies are developed, decisions are taken, and how these factors impact competitiveness in business and commerce.

## Programme Objectives:

- To provide students with a sound basis for progression to the undergraduate programmes at QIU. Students can expect to participate in all types of learning experiences, from lectures to highly practical group exercises.
- To prepare students for entry into Higher Education, ensuring that they possess the necessary knowledge, values, skills and competencies to undertake one of the QIU's Bachelor of Business Administration (Hons) or Bachelor of Computer Science (Hons) programme.
